

Under the Sky

renewables education project

*Let's reach
1000
children
this year!*

*With your
support we can
make this
happen*

Rowanbank

Interactive, informative & inspiring

Renewable energy is still the future

Rowanbank is a not-for-profit environmental education organisation, facilitating inspirational projects for clients throughout the UK. Our renewables education team provides creative, curriculum linked workshops, education materials and events.

The Under the Sky project is about promoting renewable energy, and the renewables industry, as a positive solution to climate change. The project is about positive action, and can be used to help promote the work your company is doing to achieve this.

By supporting 'Under the Sky' you will be enabling children to experience renewable energy in action and to learn about the science of climate change. You will also be promoting what the renewables industry is achieving (despite the current political barriers), and helping to empower local communities to become more knowledgeable and involved in renewable energy development.

Under the Sky

renewables education project

"We've been delighted with the quality and consistency of the educational workshops Rowanbank regularly supply for us. I am delighted to recommend the company, they are experts in their field and their approachable attitude makes them a pleasure to work with".

UK Community Investment Officer, RWE Innogy UK

"A very informative and engaging opportunity to learn about renewable energy and why it is the way forward."
